Unitre Pinerolo - courses in English

Hidden word games

Spring edition

Spring has already arrived or it should be so but this year its pleasant energetic light is obscured by a nasty virus. Anyway, let's hold on ! At the end - thank God - the human being will be the winner. The games that are waiting for you, as the previous ones, are a little resource to keep our mind and memory active and ready for new U3 English courses. Moreover, in some "games" the number of the terms could increase with a new "discovery" of yours.

Let's start to work...ops, to play !

The **25 terms** to individualize are connected to the animal world (mammals, birds, insects, fishes, reptiles , ...) As it was already said, don't forget that a term could be in its initial letters or in its final ones a part of another term .

The **terms** to look for in this scheme are **related to the “external” human body**. Of course the list is not complete. The terms to recognize are in fact only 23 Finally, don't forget how a term can be placed in a line.

These exercise-games could be a bit more difficult than the others because the terms to be recognized are not only of one or two categories but of all the categories: names, adjectives, prepositions, pronouns, verbs, numbersAnyway, even if their number could be relevant, the space of this game limits them. Not to forget - as it was already said - a term can “contain “ in its initial or in its final letters an entire other term or just a part. An example:

uponex time up upon on one ex next time me

Besides, I could not have recognized other“ terms” that are present. The list with your help will go on...

The “spring game exercise” is over but let your mind go on with other stimulating pastimes. “The opening time” will be back and to reach little places not far from the place where we live, will be surely a pleasant rediscovery. A stimulating surprise in these days of restricted movement could be also to look for and look at photos of our past years, trying to recognize people and places. Not only our memory could be reinforced, a better opinion about some people and places could take place in our mind. The same feeling could be stimulated through the reading of what we wrote in the past in our diary or in event reports, articles, stories, novels The “past” is not a lost time; it’s a concrete premise to plan our present and our future in a right, concrete and stimulating way.

Light days !
